**01**

Upgrading and simplifying file transfer for a future-proof enterprise

As pressure grows to move more mission-critical data quickly and securely, enterprises are looking to the cloud to upgrade managed file transfer (MFT) operations or simplify MFT with SaaS.

85% of organizations will embrace a cloud-first principle by 2025. By 2025, Gartner estimates that over 95% of new digital workloads will be deployed on cloud-native platforms, up from 30% in 2021.¹

Axway has been a trusted partner for MFT solutions for over two decades, helping companies meet growing digital business demands, ensure robust data protection and regulatory compliance, and fill the expertise gap an increasing number of organizations are experiencing.

02

Why companies choose Axway for MFT operations

With 50 percent of business-critical processes involving file transfers or exchanges in organizations¹, Axway Managed Cloud Services for MFT provides the security and reliability businesses need to successfully upgrade or simplify their MFT operations for the future.

Security. World-class security protects business data with customizable SLAs to meet unique needs.

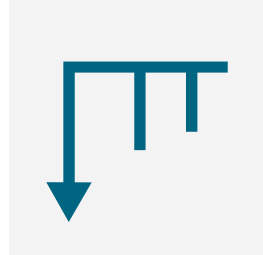

Flexibility. Support for current MFT practices with a smooth transition to a flexible subscription model.

Trust. 24/7 dedicated teams to support large file transfer volumes and complex environments.

Elevating business operations with MFT in the cloud

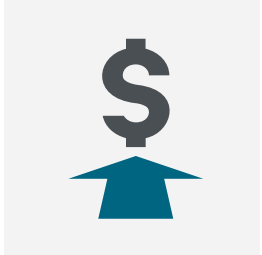

Outsourcing the management of your MFT infrastructure to Axway provides the support you need to enable digital transformation and support other business initiatives.

Reduce business and technical risks

Free up teams to focus on innovation

Optimize your total cost of ownership

California OTech supports high-quality digital services for citizens

The Office of Technology Services (OTech) is the guardian of public data for the state of California, managing tens of thousands of applications and databases used by hundreds of departments and agencies. OTech replaced time-consuming approaches to data sharing such as physical storage media and email attachments with a single, central instance of Axway Managed File Transfer.

50 state agencies and their customers can move data quickly, securely and cost-effectively

Zero need for physical storage media to send large files, reducing costs

Sensitive data secured at rest and in transit, facilitating regulatory compliance

Railinc plays a critical role in keeping North America's rail industry moving – and SecureTransport will continue to be a key enabler of our mission-critical services.

Jeffrey Yusiewicz, Senior Middleware Messaging Engineer at Railinc

Axway Managed File Transfer has enabled us to deploy consolidated and secure file transfer services across the state, downstream to business partners, and across a multitude of use cases. It is phenomenal how many problems we are solving using this product.

Kevin Paddock, Supervisor of Web Services at OTech

bpifrance Enabling rapid setup of state-guaranteed loans and keeping the French economy innovative and competitive

Bpifrance knew that Axway MFT Cloud Services would give them the flexibility, scalability, reliability, and fast time-to-market they need as a public investment bank. Within just three months, they put in place more than 700 secure file transfer connections with French banks and achieved a 300 percent increase in data volumes.

Enables rapid set-up of secure financial payments to external partners

Empowers French economy to respond rapidly and intelligently to future challenges

Simplifies management of information flows and provides practically unlimited scalability

“

With a stable, secure and above all flexible cloud platform from Axway for exchanging files with partners and clients, we are confident that we can meet whatever the future has in store.

Bruno Chevalier, Manager/Enterprise Architect at Bpifrance

Textron moved from on-prem to Axway MFT Cloud Services

Textron is a multi-industry company with a global network of aerospace, defense and intelligence, industrial, and financial businesses. Huge volumes of data underpin Textron's operations, from design workflows to manufacturing processes on the factory floor. As Textron's information security requirements grew, the company sought a more efficient way to ensure its MFT landscape was always protected from cyber threats.

>6 million MFT transactions a year

20,000+ files per day, ranging in size from 100 KB to 10 GB

24/7 tracking for every file transfer and around-the-clock support

Who Is Axway?

Axway is a pioneer in the world of data integration, enabling enterprises to securely Open Everything and move data across a complex world of new and old technologies. Our API management platform, Amplify, serves as the cornerstone for API strategies and successes realized by top brands worldwide, and our managed file transfer and EDI/B2B integration solutions have been proven and trusted for over 20 years.

What we do

We provide expertise and technology that has helped over 11,000 businesses in more than 100 countries unlock the full value of their enterprise data to create brilliant customer experiences, expand into new markets, and take advantage of emergent opportunities.

How we do it

Axway's API-first approach supports secure, cloud-based digital ecosystems. With Axway Managed Cloud Services for MFT, businesses can:

- Migrate to the cloud, a little or a lot, at their own pace
- Upgrade or simplify MFT operations at a predictable cost
- Secure data, meet SLAs, and ensure regulatory compliance
- Future-proof operations with flexible implementation and high availability
- Focus on innovating new services, responding to disruption, and growing the enterprise

The power of a cloud platform paired with expertise

- Single-tenant environment, with the ability to deploy to any region(s)
- Optimized for high SLAs up to 99.99%
- A flexible model with options and levels of SLAs
- Predictable pricing with upgrade costs included
