

Fleetsoft - Fleet Maintenance & Parts Inventory Management Software

Since 1996, thousands of fleets spanning various industries worldwide have placed their trust in Fleetsoft - Fleet Maintenance and Parts Inventory Management Software. Offering robust functionality while maintaining simplicity, Fleetsoft facilitates everything from daily data entry to extensive trend analysis. Accessible from any device, Fleetsoft stands out as a versatile, feature-rich, and user-friendly application.

Features

Work Orders - Monitor every work order performed and easily access each vehicle's service and parts history.

PM Scheduling - Automatic PM tracking keeps you on top of each vehicle's scheduled maintenance.

Parts Inventory - Know real-time quantities of each part and reports to you what parts need to be re-ordered.

Parts Warranty - Save thousands by being flagged when a part is under warranty while adding it to a work order.

Reported Problems - Log problems reported on each vehicle and automatically inform technicians about it when making a work order.

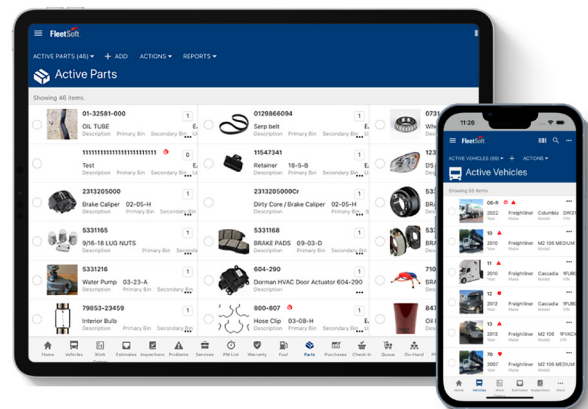

Vehicle Parts and Service History - Vehicle Parts and Service History

Additional Features Include: Fuel Tracking/ Fuel System Interface, Vehicle Warranty Tracking, Licensing and Permits, Driver License Management, Tire Tracking, Daily Logs, Miscellaneous Expense Tracking, Core Tracking, Vehicle Warranty Tracking, Purchase Orders, Parts Cross Reference, Export to Excel, Bar Coding, Multi-Sites Support, Customer Invoicing, Employee Timecard.

GPS Telematics Interface - Seamlessly receive your GPS system's data into FleetSoft to update odometer readings, record mileage logs and even view fault codes. Supported systems include: Geotab, Zonar Systems, Samsara, Motive/KeepTruckin, Verizon, Synovia Solutions, Spireon, JJ Keller, Navistar OnCommand, Omnitracs XRS, Forward Thinking Systems and more (full list on our website and inquire with our office if your system is not listed).

QuickBooks Interface - Convert Fleetsoft customer invoices to QuickBooks invoices.

Money Saving Features

- *Warranty Recovery*
- *Maximize Inventory Investment*
- *Extend Unit Life*
- *Save Money by Reducing Fuel and Tire Costs*
- *Increase Mechanic Productivity*
- *Boost Asset Uptime*
- *Centralize Control of Fleet Costs*

GPS Meter Readings

Vehicle odometers will update automatically from data brought in from current GPS/telematics provider. This will then flag PM's automatically and warn the mechanics that a work order needs to be done.

GPS Telematics Data

Filtered fault codes will be sent to Fleetsoft and the mechanic will be shown the current Fault Codes alerts from the vehicle from within Fleetsoft.

GPS Asset Locations

Fleetsoft brings in the GPS coordinates of location of the vehicle and displays it on a map.

DVIR Defects

Failed inspection data will be sent to Fleetsoft as a Reported Problem and will warn the Mechanics to fix the problem. Once it is fixed, it is removed from the current problem list.

Training Options

Fleetsoft offers online, in-person group (at Fleetsoft headquarters) and on-site (at customer's location) training options. Fleetsoft also offers free webinars throughout the year for software updates and releases.

Testimonials

"The CEO asked about service on his vehicle. In about 10 seconds, I was able to give him the last service date, mileage and next service due date."

Meriwether Lewis Electric Cooperative

"The latest version is very user-friendly. I like the fact that I can break down each department's equipment and get a total cost of their repairs."

Doug, City of South Lyon
